🏰 Project Proposal: Castle Siege 3D – Fortress Defense

Overview:
"Castle Siege 3D – Fortress Defense" is an engaging third-person 3D defense game where players take control of a stationary cannon within the courtyard of a fortified castle. The player must defend the fortress walls against waves of advancing enemies, employing strategic aiming, movement, and timely firing to survive. The game emphasizes quick decision-making, spatial awareness, and resource management.

Gameplay Mechanics:
Players control a cannon that can rotate in all directions and move within the interior limits of the fortress. They must fire cannonballs at incoming enemy forces before the enemies breach the walls. Each wall section possesses its own health, gradually deteriorating under enemy attack. Once a wall collapses, it opens new pathways for enemies to flood into the courtyard, increasing the pressure on the player.

The player earns points by eliminating enemies and is rewarded for maintaining the integrity of the fortress. As waves progress, enemy types diversify, introducing faster foot soldiers, heavily armored siege engines, and battering rams capable of quickly demolishing structures.

If all walls are destroyed or the player is overwhelmed by enemies entering the courtyard, the game concludes in defeat. Surviving all enemy waves without the complete loss of the fortress results in victory.

Game Features:

1. **Dynamic Enemy Waves**:
Enemies spawn in increasingly challenging waves, with different movement speeds, health levels, and attack patterns.

2. **Destructible Environment**:
Fortress walls can be weakened and destroyed through continuous enemy assault, dynamically altering the battlefield.

3. **Tactical Player Mobility**:
Although limited to the courtyard, players can reposition their cannon to respond to emerging threats more effectively.

4. **Multiple Enemy Types**:
The game features a variety of enemy units, including fast-moving foot soldiers, durable siege engines, and battering rams with specialized wall-breaking capabilities.

5. **Progressive Difficulty**:

Enemy strength, quantity, and aggression escalate with each new wave, demanding quicker reactions and sharper aim from the player.

6. **Score and Health System**:

Players maintain a life count and score tally based on defensive success. High scores incentivize survival and accurate targeting.

7. **Victory and Defeat Conditions**:

The game ends either when all fortress walls are breached and the player is overwhelmed or when the player successfully defends against all enemy waves.

📋 Summary:

"Castle Siege 3D – Fortress Defense" challenges players to protect their stronghold against relentless enemy forces through strategic positioning, precise firing, and tactical management of an evolving battlefield.

Forest Quest 3D – Relic Hunt

Overview:

A light 3D adventure game where the player explores a magical forest to find hidden relics, avoid traps, and face simple enemies. Designed for easy play and development.

Game Features :

1. **Third-Person Player Control**
    - Move, run, jump, and rotate camera in a 3D forest world.
2. **Single-Level Open Forest Map**
    - One medium-sized map with different areas (lake, ruins, cave).

3. **Basic Collectibles**
    - Find 3 ancient relics to complete the quest.
4. **Simple Puzzle Elements**
    - Press buttons, move blocks, or step on pressure plates to unlock relics.
5. **Light Combat System**
    - Fight basic enemies like forest spiders using one attack move.
6. **Health System**
    - Health bar decreases from enemy hits or traps; pick up health orbs to heal.
7. **Checkpoints**
    - Auto-save at two fixed spots (e.g., near relics).
8. **Mini Map or Compass**
    - Shows player direction and approximate relic locations.
9. **Victory Condition**
    - Game ends with a win after collecting all 3 relics.
10. **Defeat Condition**

- Game ends in defeat if health reaches zero.

Summary:
Forest Quest 3D – Relic Hunt is a short, simple 3D adventure perfect for beginners or small teams. It focuses on light exploration, collecting relics, and basic enemy encounters.
